April 25, 2022

Mr. Charlie Schmidtman
Nederland Fire Protection District
650 W. 4th Street
Nederland, CO 80466

Dear Mr. Schmidtman,

Thank you for allowing Verticomm the opportunity to understand the objectives and business goals of Nederland Fire Protection District. We are highly confident that the NEC solution we have designed will exceed any other platform available. We also have a very in depth understanding of your expectations, not only from a company performance standpoint, but also from an operational perspective.

The NEC platform we are proposing will be the last platform the Nederland Fire Protection District will need to invest in for many years to come because of the system capabilities, and with ongoing NEC SWA support, you are only a software upgrade away from the most current version leveraging newest features from NEC's R&D experts.

Founded in 1999, Verticomm, an ACP Company, is a leader in the UC landscape for the Rocky Mountain region. Our team will provide you with efficient, honest, and professional service as our technicians and engineers are certified on every product we deploy.

We look forward to a continued long-term business partnership with Hampden Inn and provide you with the best consulting service as your business continues to grow.

Sincerely,

Gary Clark
Senior Technology Consultant
Verticomm (A Division of ACP)

Scope of Work

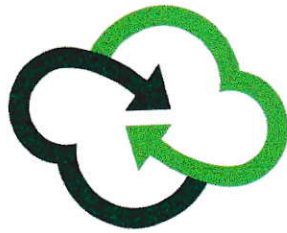

Sale and installation of a new NEC SL2100 digital phone system with analog trunks. The new NEC will have a 2-year hardware warranty, Software Assurance, and 1-year labor warranty providing Nederland Fire Protection District with a comprehensive protection plan.

All installation and training will be completed by Verticomm. Installation will be scheduled Monday through Friday between 8am and 5pm, unless otherwise requested.

Verticomm will provide the following.

- Project management- start to finish
- Database gathering
- Design/ Engineering features and products
- Programming of all NEC related components
- Connect up to 3 existing analog CO lines and test inbound/outbound calls
- Cross connect the 17 digital telephones and test.
- Provide administrative training for designated staff
- Provide end user training

System Configuration			
Platform	NEC SL2100	24 button digital telephones	17
