Charlie;

I received a quote for the 3 valves.

Your price for the valve is \$840.00 plus labor to replace them.

Not having done one I'm guessing about an hour for the rear one and between an hour to two for the side ones.

The one with easy access should be closer to the hour time frame.

At \$90.00 an hour that would be around \$360.00 in labor. Ideally less than that.

The valves are 7-10 days out.

Thanks Charlie
