

Robert Emmet Sheehan

During the eighties, I worked as a Civil Engineer for the Saint Louis County Department of Highways and Traffic. My duties included bridge inspection and inspection of road construction projects.

In the nineties, I worked as a programmer, first for McDonnell Douglas, then Saint Louis County Data Processing, REJIS Commission, and finally for Solution Consultants. My duties included application development and systems administration.

I returned to graduate school in 2002, graduating in 2005. After graduation, I ran my own structural consulting business until 2010. I have been retired since then.

With my background in programming and Civil Engineering, I can sometimes be, to a fault, constrained by the dictates of logic.

I joined Ned Fire in 2001, eventually attaining the rank of Lieutenant before leaving in 2011. In 2004 and 2005, I was voted Firefighter of the Year. I came in first in my class in Boulder Rural's firefighting academy (Spring 2002). Russ, Eric, Iain and Charlie have worked with me.

Ned Fire's professionalism impresses me. Frankly, I view Board membership as an opportunity. The Fire Department can benefit from my experience, and I can have the satisfaction of participating in a results-oriented organization while serving my community.

My wife, Claudia, and I have lived on Ridge Road since 2000.
